EXPERIENCE WORK

Software Engineer and Web Developer

2027 - Present | Google
Developed and maintained scalable web application using modern frameworks and technologies. Collaborated with cross-functional teams, including designers and content creators, to deliver seamless user experiences. Engineered backend APIs and optimized database performance for faster response times. Led code reviews and provided mentorship to junior developers.

2022 / 2023 - Amazon
Designed and implemented responsive web interfaces ensuring cross-browser compatibility. Worked closely with content creators and UI/UX designers to maintain design consistency. Enhanced website performance and SEO through best coding practices. Automated deployment processes and maintained version control using Git.

2021 / 2022 - Facebook (Meta)
Assisted in the development of full-stack web applications, from front-end design to backend development. Built custom web components and reusable code modulesto improve development efficiency. Conducted testing and debugging to ensure smooth functionality. Coordinated with clients to understand project requirements and deliver tailored solutions.
